Compared to earlier centuries, the 21st Century has been experiencing the rapid speed of change, which is transforming the whole world in many ways. The first Industrial Revolution, taken place in the late 18th century, changed the then world with steam power and mechanization, the Second Revolution, taken place in the late 19th century, with electricity and assembly lines, the Third Revolution, taken place in the mid-20th century, with Information-Communication Technology and Automation. Now a wide range of new technologies and innovations has been changing the ways of doing business and almost everything done by the people. This Fourth Revolution, rightly termed as Industry 4.0 encompasses many new technologies and innovations like Artificial Intelligence (AI), Virtual Reality (VR), smart robots, chatbots, the Internet of Things (IoT) and so on and so forth. Sophia, whom Saudi Arabia has conferred its citizenship, is the best creation of Artificial Intelligence. The concepts of paperless offices and man-less factories are getting firm roots in the society. These aspects of growth and development have touched almost all aspects of human life. This pace of change has raised many questions for which the research scholars have to be chest thumping and muscle flexing in finding the solutions in coming times.
