

## Organization of Workshops/Seminars/conferences

As a Curriculum Implementation Policy the institute organizes different kinds of Workshops, seminars and conferences for the academic upgradation of the faculty and curriculum enrichment of the students. It invites expertise in the concerned area to enhance the subject knowledge of the students and encourages students as well as faculty to take this opportunity to enhance their field knowledge. Such a kind of organization avails a chance to meet the faculty from other educational institutes and provides an opportunity to share and exchange the experience and subject knowledge among the faculty.
